Using the 4 Family Life Practices allows an opportunity for parents to implement research-based practices that supports family well-being and their child's school readiness. The following identifies those practices and progress made by families over the school year.

The rating scale (vertical axis) measure's progress with

- 1 being the strategy is not implemented at all,
- 2 is implemented sometimes,
- 3 is most often implemented, and
- 4 is a strength or always implemented.

The chart represents the results of all families. As we know from analyzing child outcomes, the level of support a family needs is individualized. We are reinforcing with staff and families the importance of these practices and the use them in concert with information shared and obtained during parent/teacher conferences, home visits and during advocate/parent contacts. HSEOC emphasizes the positive effects a supportive home learning environment has on a child's learning and school readiness.
